

Gordon House Refurbishment

AT A GLANCE

Client: Mitre Construction Ltd

Value: £400k

Date: April 2025

Scope: Refurbishment of nine flats, plus communal areas

GAM Group successfully completed the refurbishment of Gordon House, Bognor Regis, in April 2025. Commissioned by our valued client, Mitre Construction Ltd, this project followed a competitive pricing exercise and built on the strong relationship established through previous collaborations.

The scope of works encompassed the full refurbishment of nine individual flats alongside extensive upgrades to the communal areas.

Our team delivered a comprehensive package of services, including plastering, plasterboard installation, flooring, tiling, joinery, and decorative finishes. Mechanical and electrical works were integrated seamlessly, while new kitchens and bathrooms were installed to modern standards.

Communal spaces were enhanced with fresh carpets, lighting, and durable finishes, ensuring both functionality and aesthetic appeal.

A key focus throughout was quality and efficiency. By coordinating trades and maintaining clear communication with Mitre, we ensured minimal disruption and timely delivery.

The project not only revitalised the living environment for residents but also reinforced GAM Group's reputation for delivering complex residential refurbishments with precision and care.

Gordon House now stands as a testament to our expertise in multi-unit residential projects, combining technical excellence with client-focused delivery.
